April Is National Heartworm Awareness Month

In Florida, heartworm disease is something that affects animals year-round. Since our weather never gets a long-term freeze, mosquitoes are ever-present. Did you know that it only takes 6 months after being bitten by an infected mosquito for your pet to develop heartworm disease? The mosquito injects the heartworm larvae that then live in the blood stream- once they mature into adults they make their way to the heart and invade the chambers of the heart making it harder to properly pump blood

throughout the body. That's why it's so important to keep your pet on monthly prevention. Heartworm prevention will kill heartworm larvae (called microfilariae) before they have a chance to develop into adults.

We offer several products to keep your pet safe and healthy.

Help Stop Cruelty

April is also Prevention of Cruelty to Animals Month. Whether big or small every animal has a place in our hearts and deserves not to know what cruelty is. We encourage everyone to be an advocate. Donate to your local shelters if you can and choose to adopt-don't shop. Or if you know of an animal in danger, speak out or contact your local authorities. Most will give you the option to report anonymously as well. Help stand up for those without a voice.

**Stop Cruelty
To Animals**

Heartworm Test Promotion

We take heartworm disease seriously, and to help promote safety for your pet(s) this month we are willing to offer a **FREE** heartworm test with the purchase of a one-year supply of prevention.

Heartworm test must be negative for offer to apply.

Heartworm prevention we offer:

- 🐾 Sentinel Spectrum
- 🐾 Heartgard Plus
- 🐾 Revolution (for cats)

... it only takes 6 months after being bitten by an infected mosquito for your pet to develop heartworm disease...
